## First-in-class non-opioid analgesic

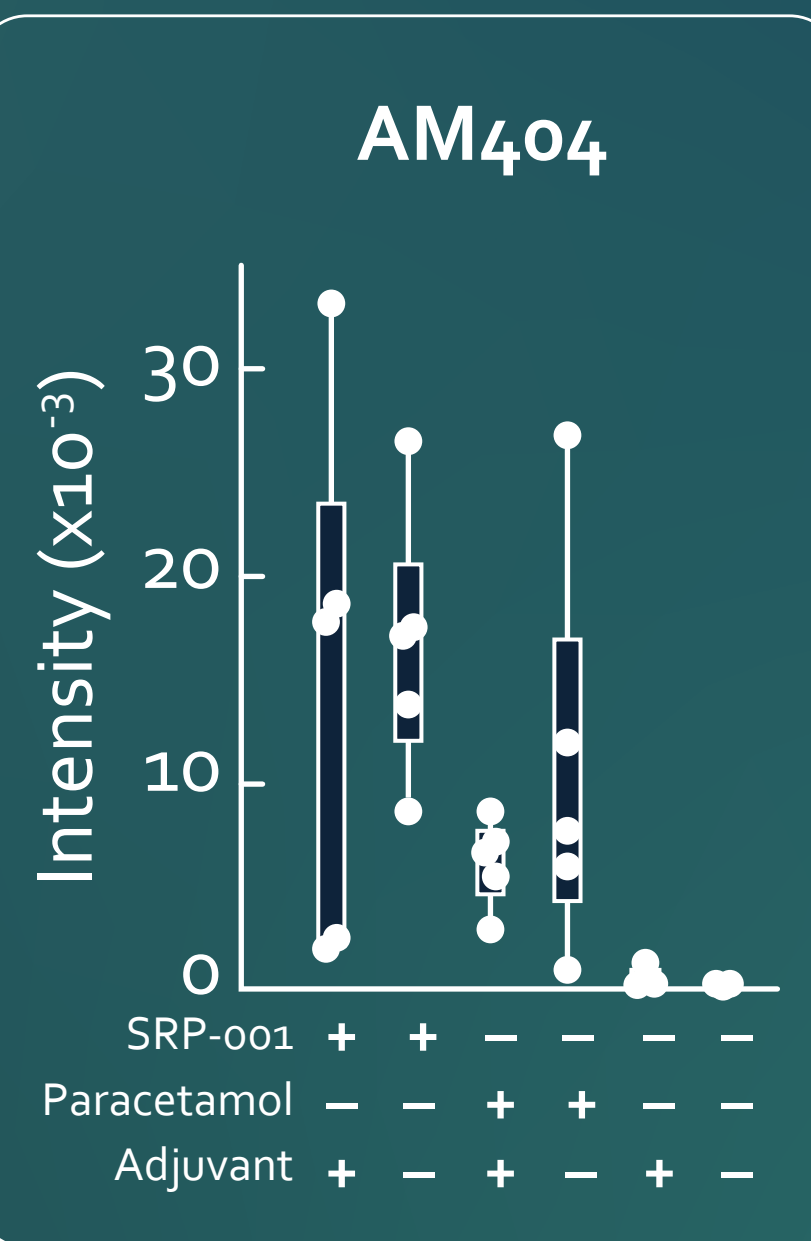

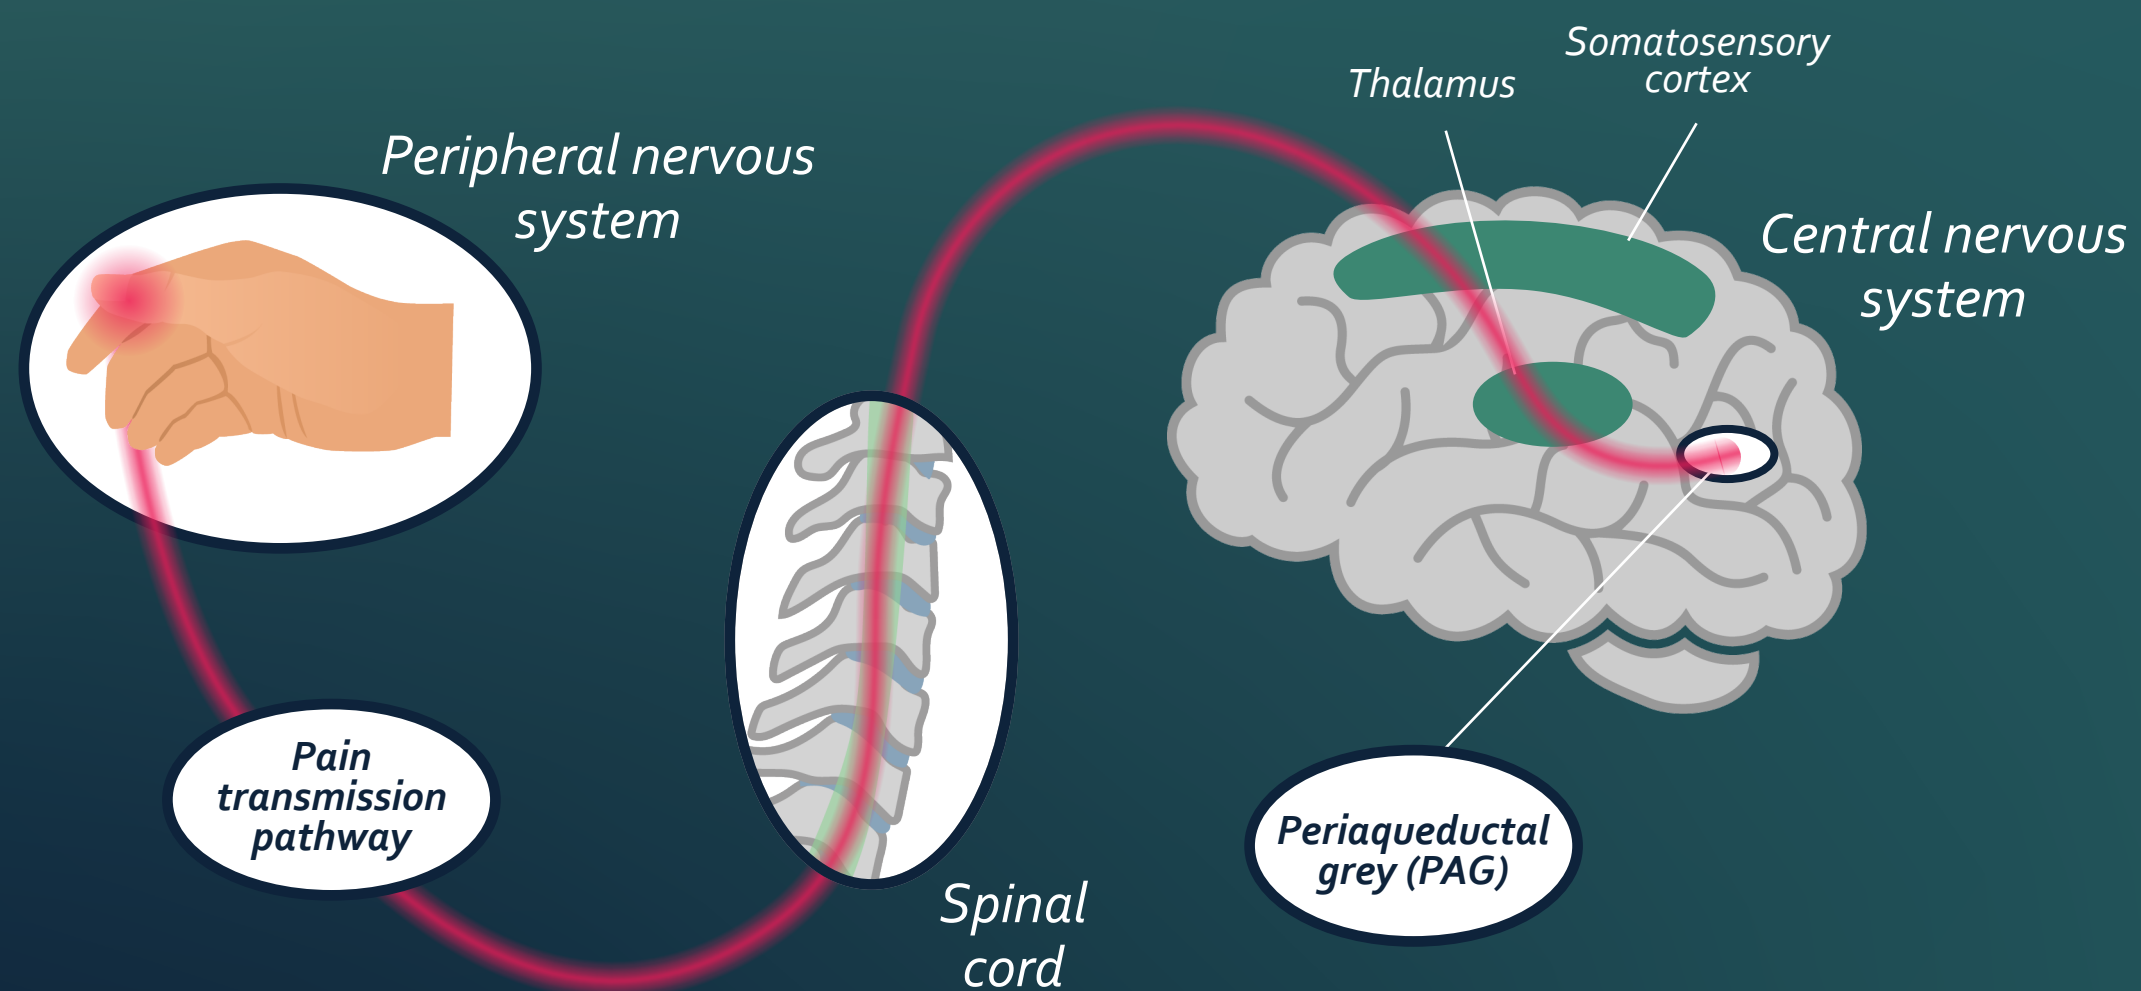

Pain affects > 25% adults worldwide, presenting a global health challenge

Current pain management solutions often come with **adverse effects** that exacerbate the problem

SRP-001 is a novel solution: a **non-opioid analgesic** that targets the brain's pain signaling pathways

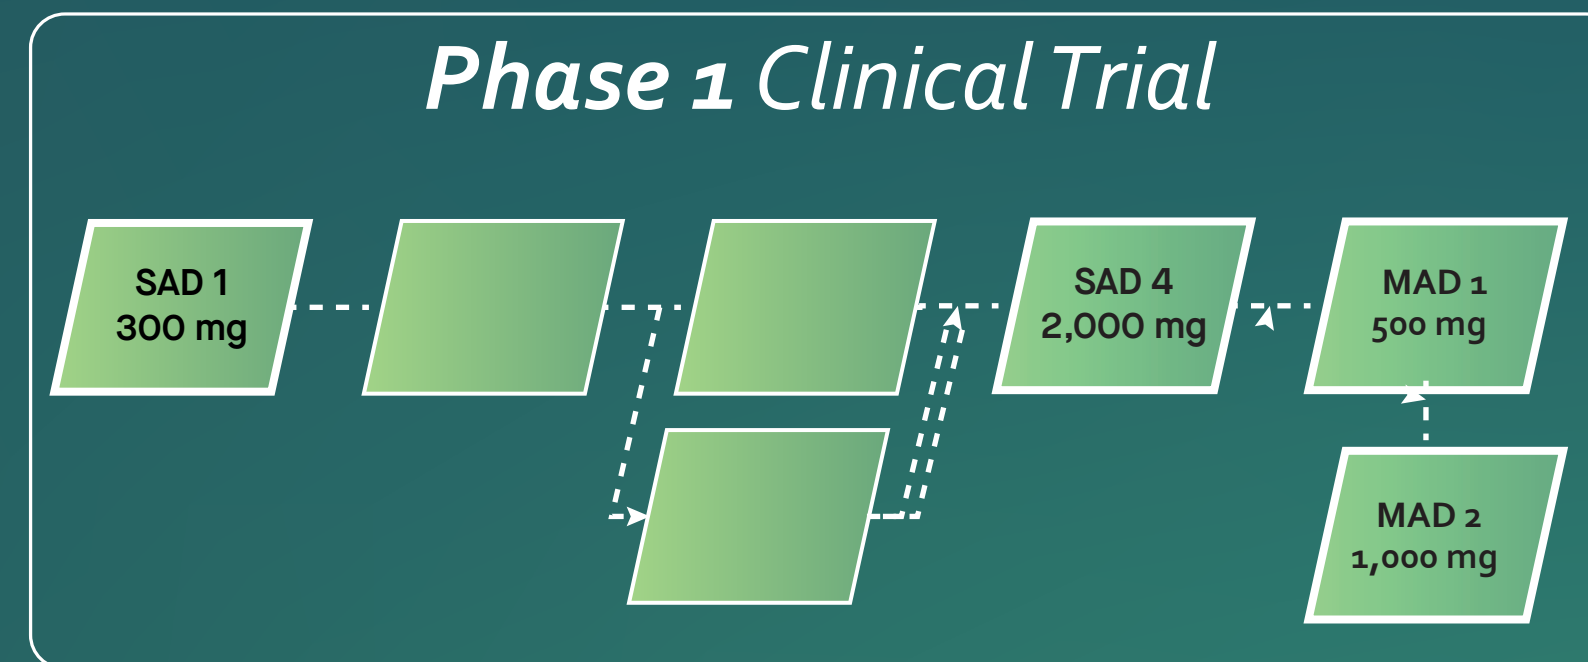

SRP-001 produces more pain-relieving AM404 than paracetamol

### Advantages

- No abuse potential
- Avoids liver-damaging metabolites
- Lacks kidney & GI damage (NSAIDs)

### Phase 1 Clinical Trial

No SAEs, Excellent PK & T<sub>1/2</sub> Observed

# SRP-001 can relieve pain without harmful side effects
